TWINE

IT | L'Avventura Senza Confini

Il nostro progetto si distingue per un motto audace: "The World Is Not Enough"

Il mondo non è abbastanza.

Questo è l'eco di un titolo iconico della cinematografia, ispirato a James Bond, l'agente segreto più emblematico, la cui vita è un continuo viaggio attraverso luoghi esotici e sfide straordinarie.

Bond non è solo un esploratore; è il simbolo di avventure che si intrecciano con culture, abitudini e costumi, affrontando esperienze tanto sopra quanto sotto le onde degli oceani.

Ogni missione lo porta a vivere emozioni irripetibili, condivise con figure altrettanto forti e affascinanti, che lo affiancano nel suo cammino, sia nel pericolo che nell'amore.

L'elemento centrale del nostro progetto è il cerchio e la spirale, una metafora visiva rivolta verso il "bersaglio mobile" dei titoli di testa dei films della serie, forme che nella nostra interpretazione non sono solo un concetto geometrico ma anche simboli di movimento e potenzialità, gli elementi che rappresentano l'essenza dell'EXPLORER, lo yacht realizzato dai Cantieri delle Marche.

Il cerchio, dunque, avvolge e contiene, espandendosi in un abbraccio che segna lo spazio e il tempo. È materia e vibrazione, una traccia luminosa che allude all'infinito desiderio di nuove emozioni. Ritratto di un viaggiatore esperto, immerso in un mondo di scoperte, che si lascia trasportare da un'onda di avventure uniche e memorabili.

Per il Comandante Bond, il mondo è un palcoscenico senza limiti; e così sarà per chi avrà il privilegio di navigare sul TWINE, la barca dei sogni, un rifugio fluttuante che danza sulle acque tranquille di una rada remota o affronta con coraggio le tempeste di un oceano indomito.

Questa è l'essenza del nostro progetto: TWINE non è solo un'imbarcazione, è un modo di vivere il mare, una "casa mobile" concepita per coloro che considerano il mare come parte del loro essere, da condividere con chi amano profondamente.

TWINE

EN | Boundless Adventure

Our project stands out for its bold motto: “The World Is Not Enough.”

The world is not enough.

This echoes an iconic film title inspired by James Bond, the most emblematic secret agent, whose life is a continuous journey through exotic places and extraordinary challenges.

Bond is not just an explorer; he is a symbol of adventures intertwined with cultures, habits, and customs, facing experiences both above and below the ocean waves.

Each mission leads him to live unrepeatable emotions, shared with equally strong and fascinating figures who accompany him along the way, both in danger and in love.

The central element of our project is the circle and spiral, a visual metaphor reflecting the barrel of a gun aimed at the “moving target” of the opening titles of the film series – forms that in our interpretation are not just geometric concepts, but symbols of movement and potential, representing the essence of the EXPLORER, the yacht built by Cantieri delle Marche.

The circle thus envelops and contains, expanding in an embrace that marks space and time.

It is matter and vibration, a luminous trace that alludes to the infinite desire for new emotions.

It is the portrait of an experienced traveller, immersed in a world of discoveries, carried away by a wave of unique and memorable adventures.

For Commander Bond, the world is a limitless stage; and so it will be for those who will have the privilege of sailing on TWINE, the dream yacht – a floating refuge that dances on the calm waters of a remote bay or bravely faces the storms of a wild ocean.

This is the essence of our project: TWINE is not just a boat; it is a way of living the sea, a “mobile home” conceived for those who consider the sea part of their being, to be shared with those they love deeply.

LUCE DI CARRARA

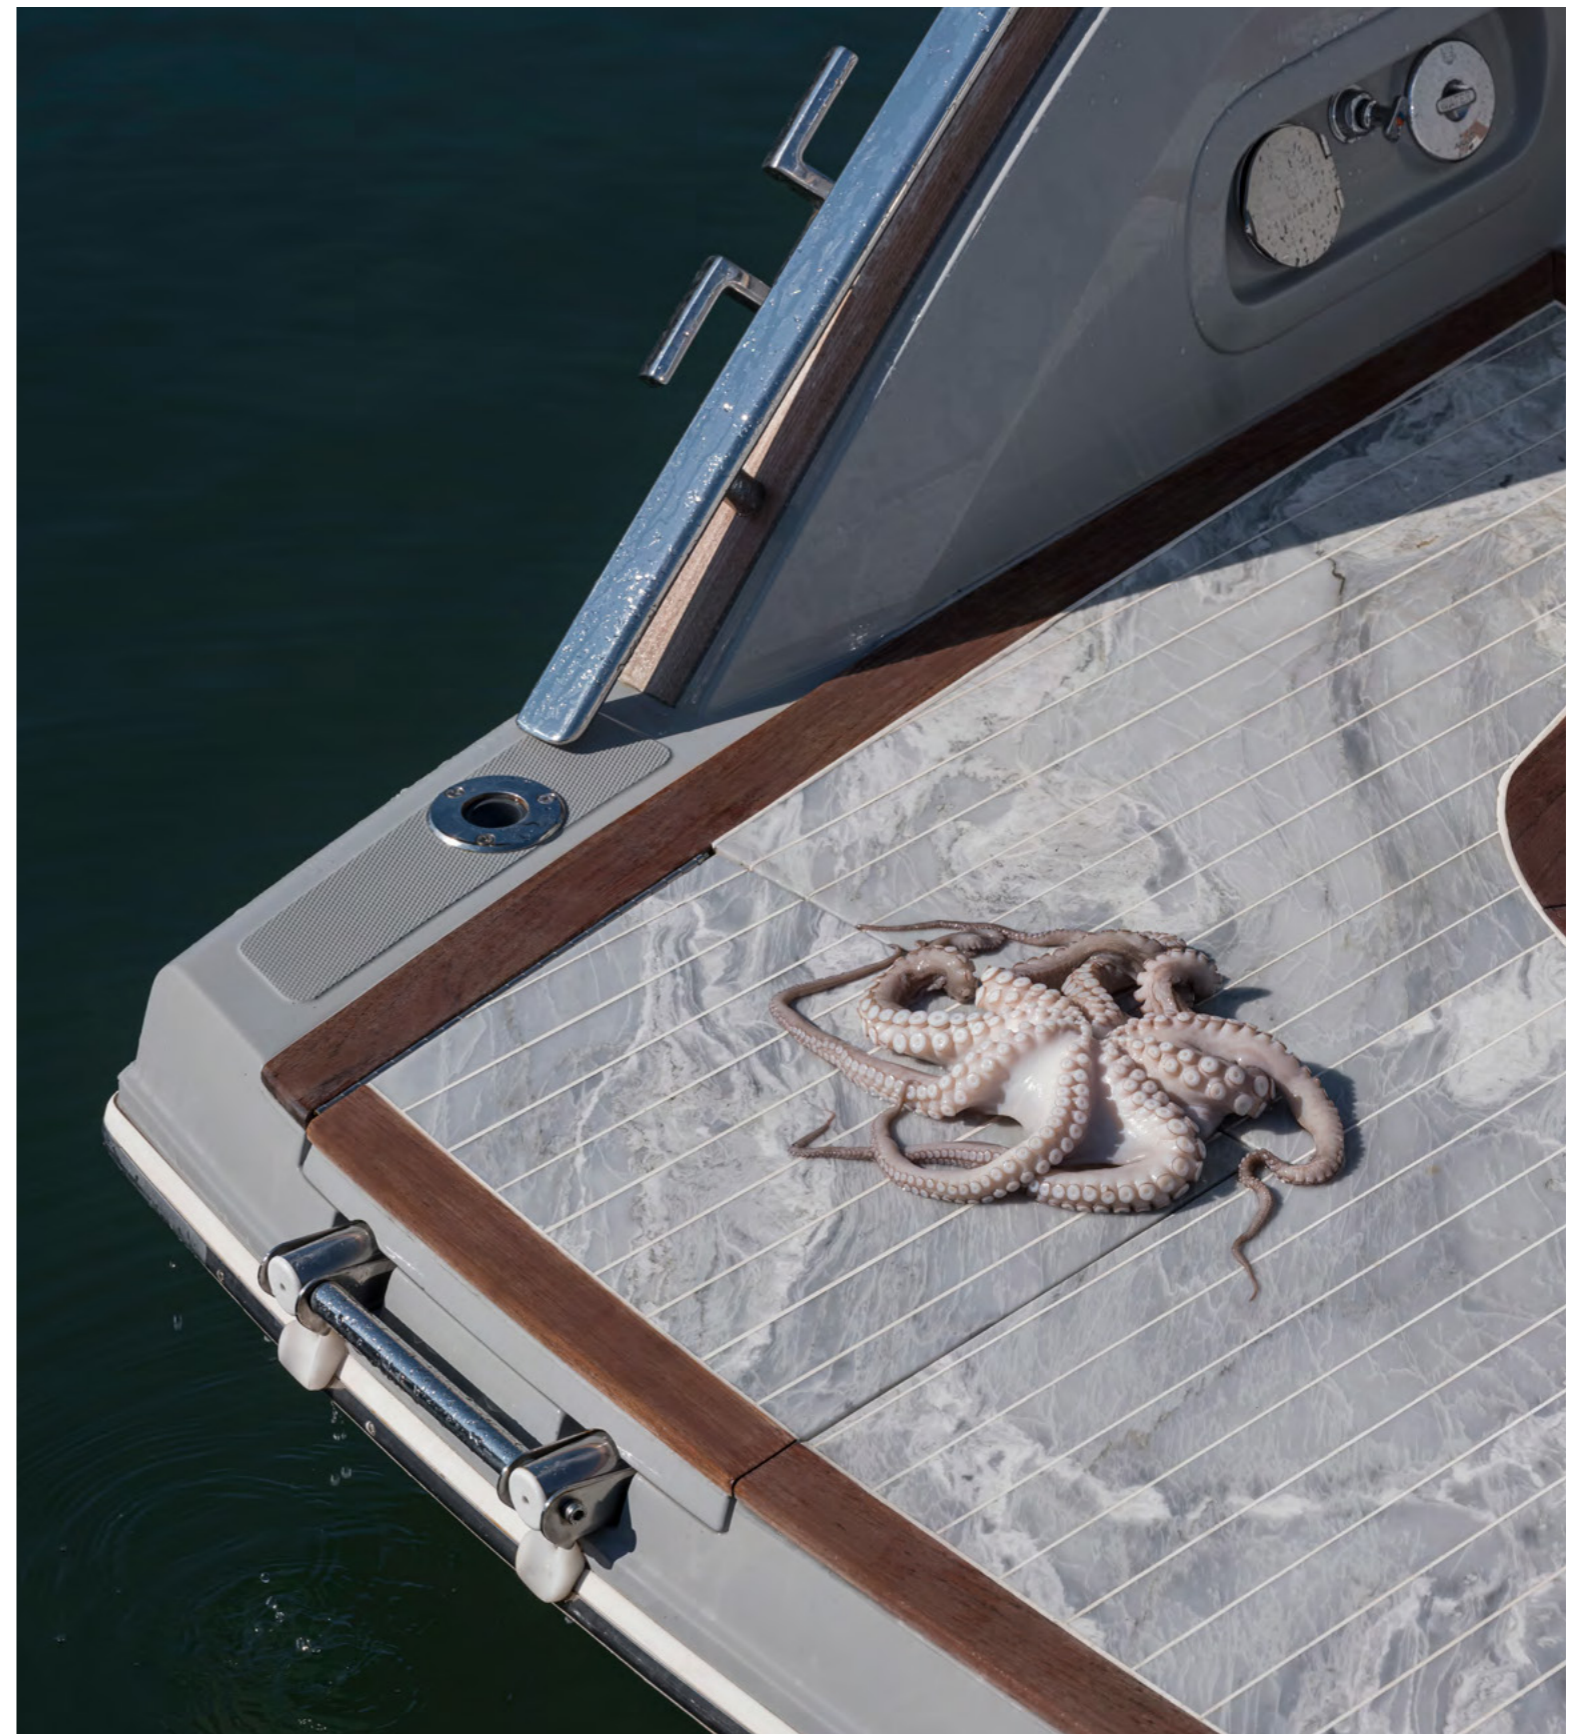

MarmoTek

Extension collection

With this ambitious project that pushes the boundaries of what is possible in the world of cladding solutions, Luce Di Carrara reinterprets the use of Teak coverings in marble. This integration of contrasts and the transformation of apparent contradictions into richness is at the heart of MarmoTek.

An embrace between stone and sea, a lightweight, bold and agile solution that is able to give strength to marble thanks to innovative manufacturing techniques. A patented formula that allows any nautical project, classic or modern, to use marble in a new way. Designed to be used on boats, its flexibility also makes it an interesting alternative for outdoor claddings, especially around swimming pools.

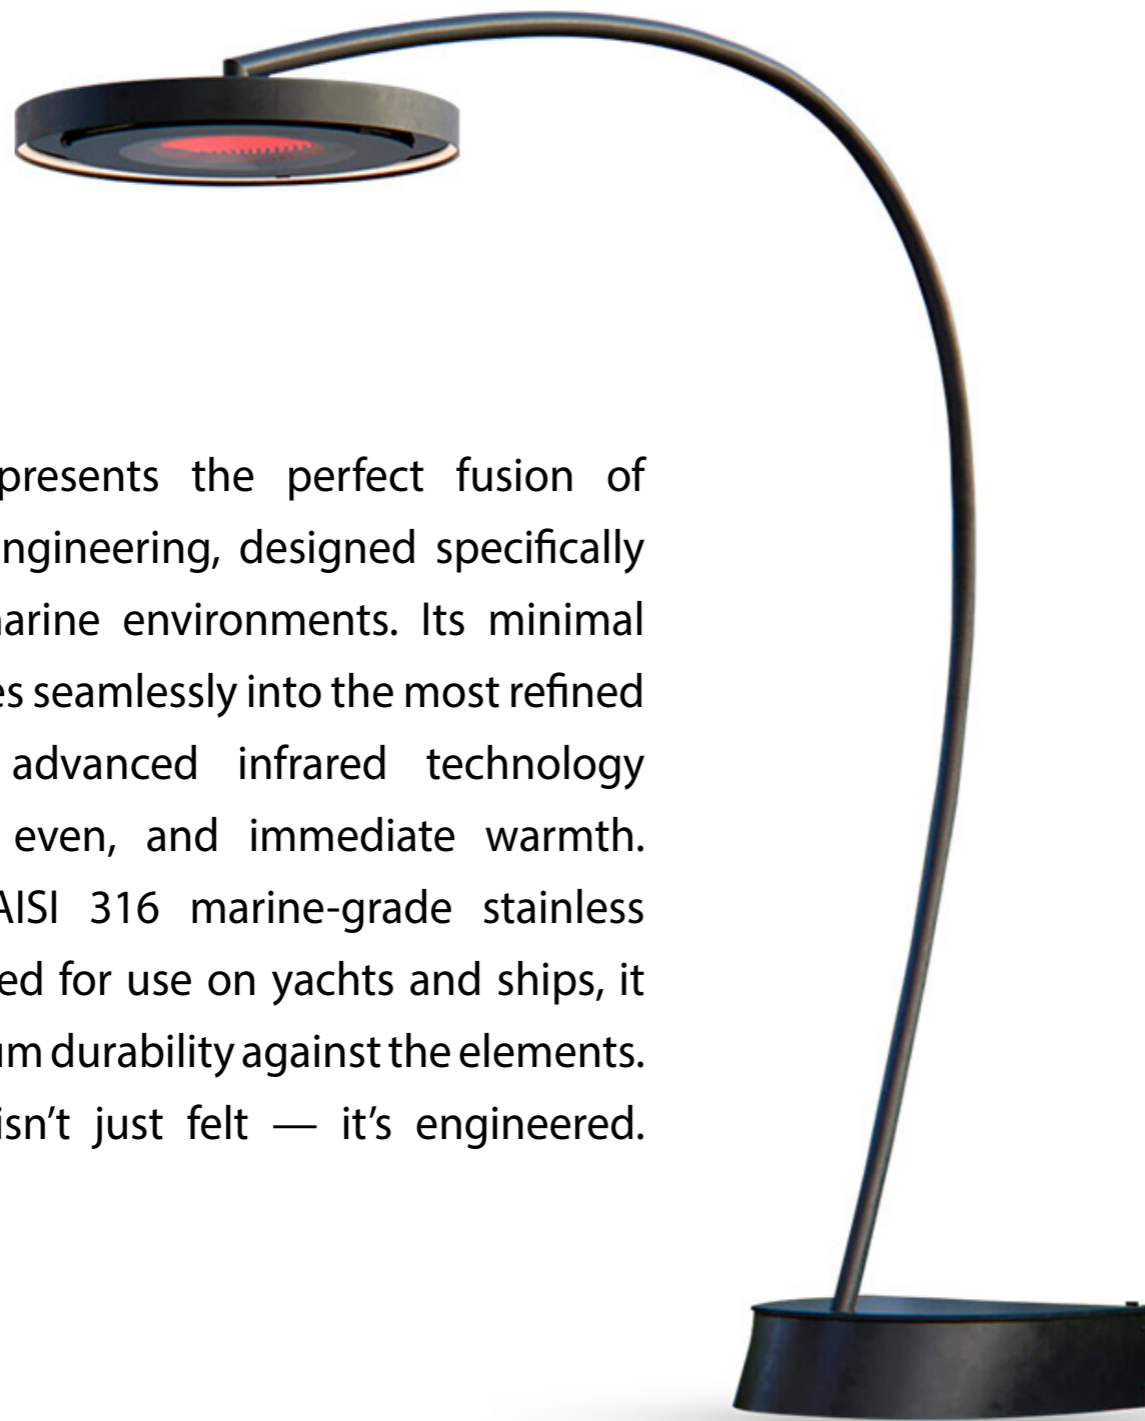

Hence, MarmoTek is not only a new way to create coverings, but an aesthetic innovation in the world of stone.

MATERIAL INNOVATION

Bromic

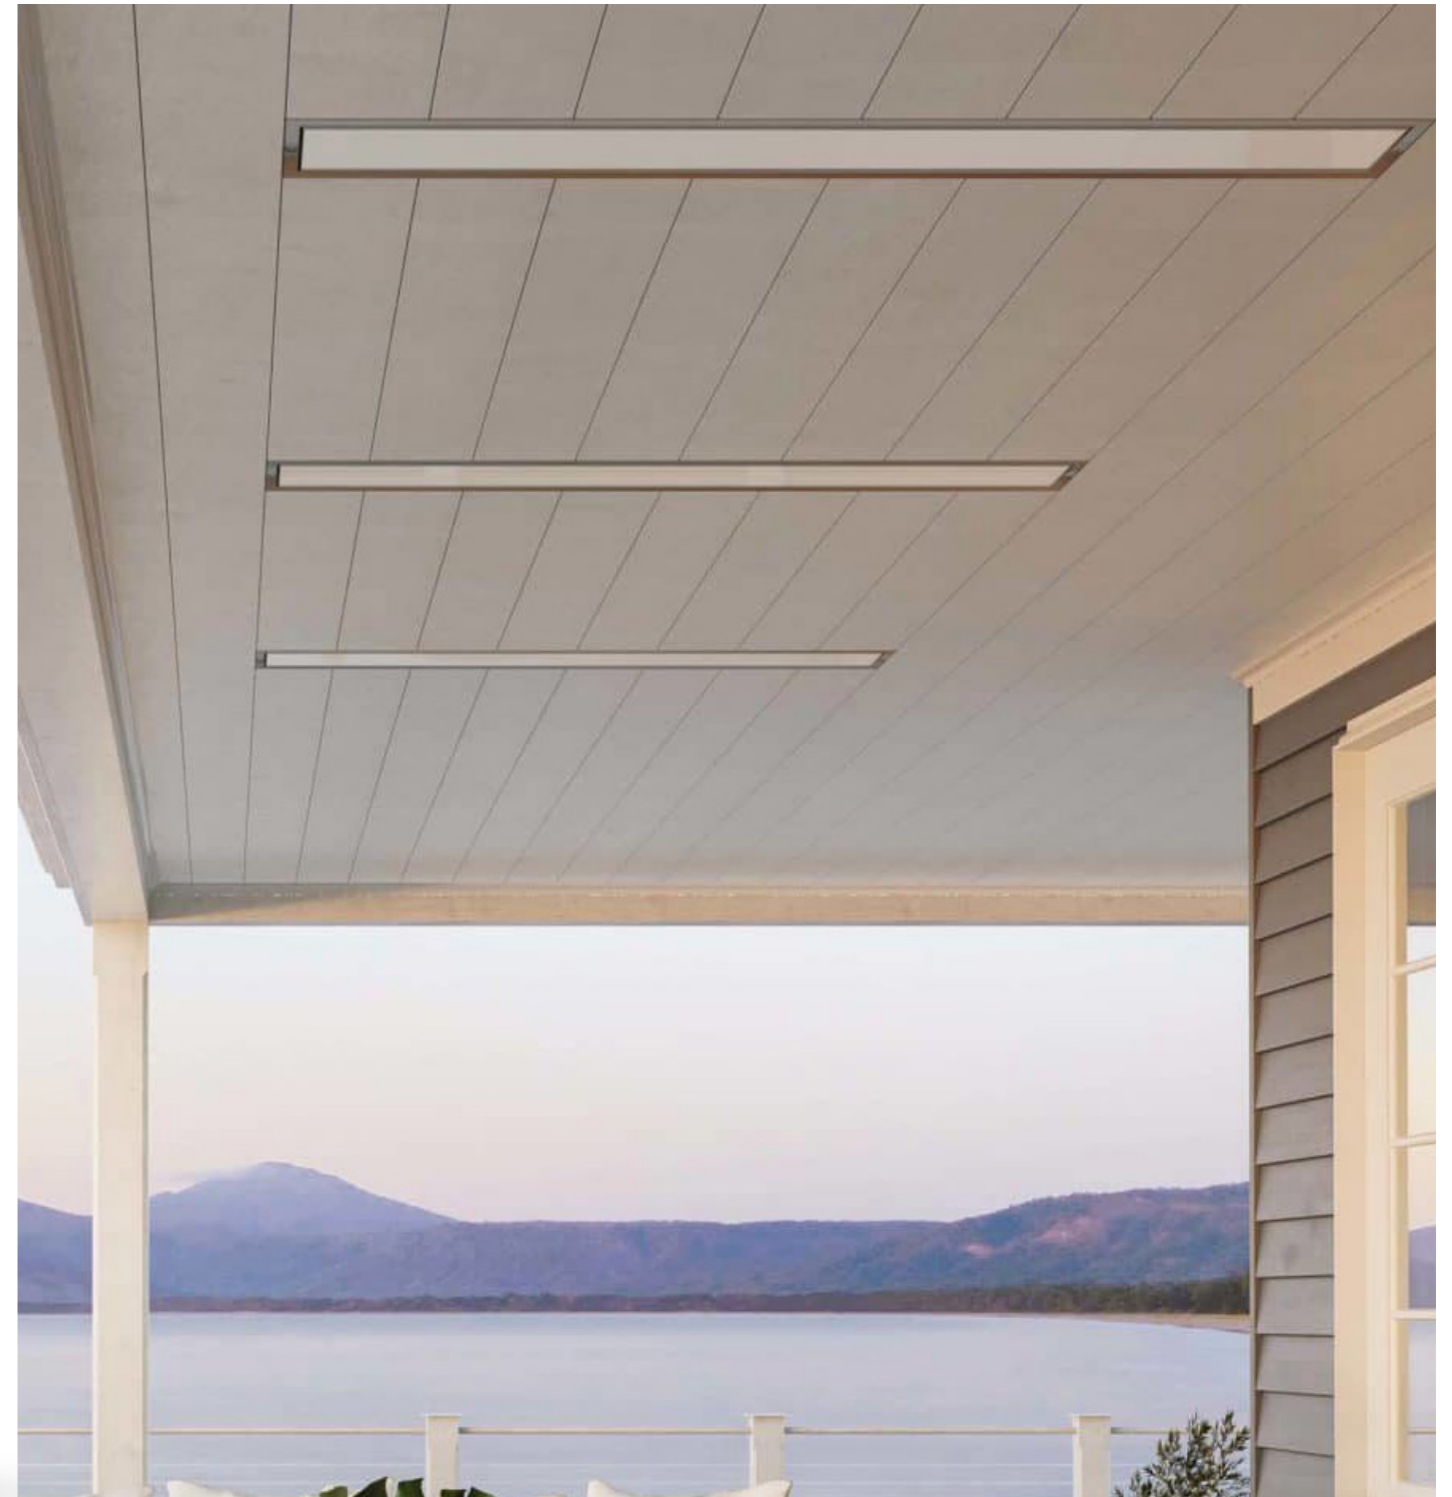

Eclipse Smart-Heat™ Portable

This heater represents the perfect fusion of elegance and engineering, designed specifically for exclusive marine environments. Its minimal design integrates seamlessly into the most refined spaces, while advanced infrared technology delivers silent, even, and immediate warmth. Crafted from AISI 316 marine-grade stainless steel and certified for use on yachts and ships, it ensures maximum durability against the elements. Here, comfort isn't just felt — it's engineered.

Bromic

Platinum Smart-Heat™ Electric Marine

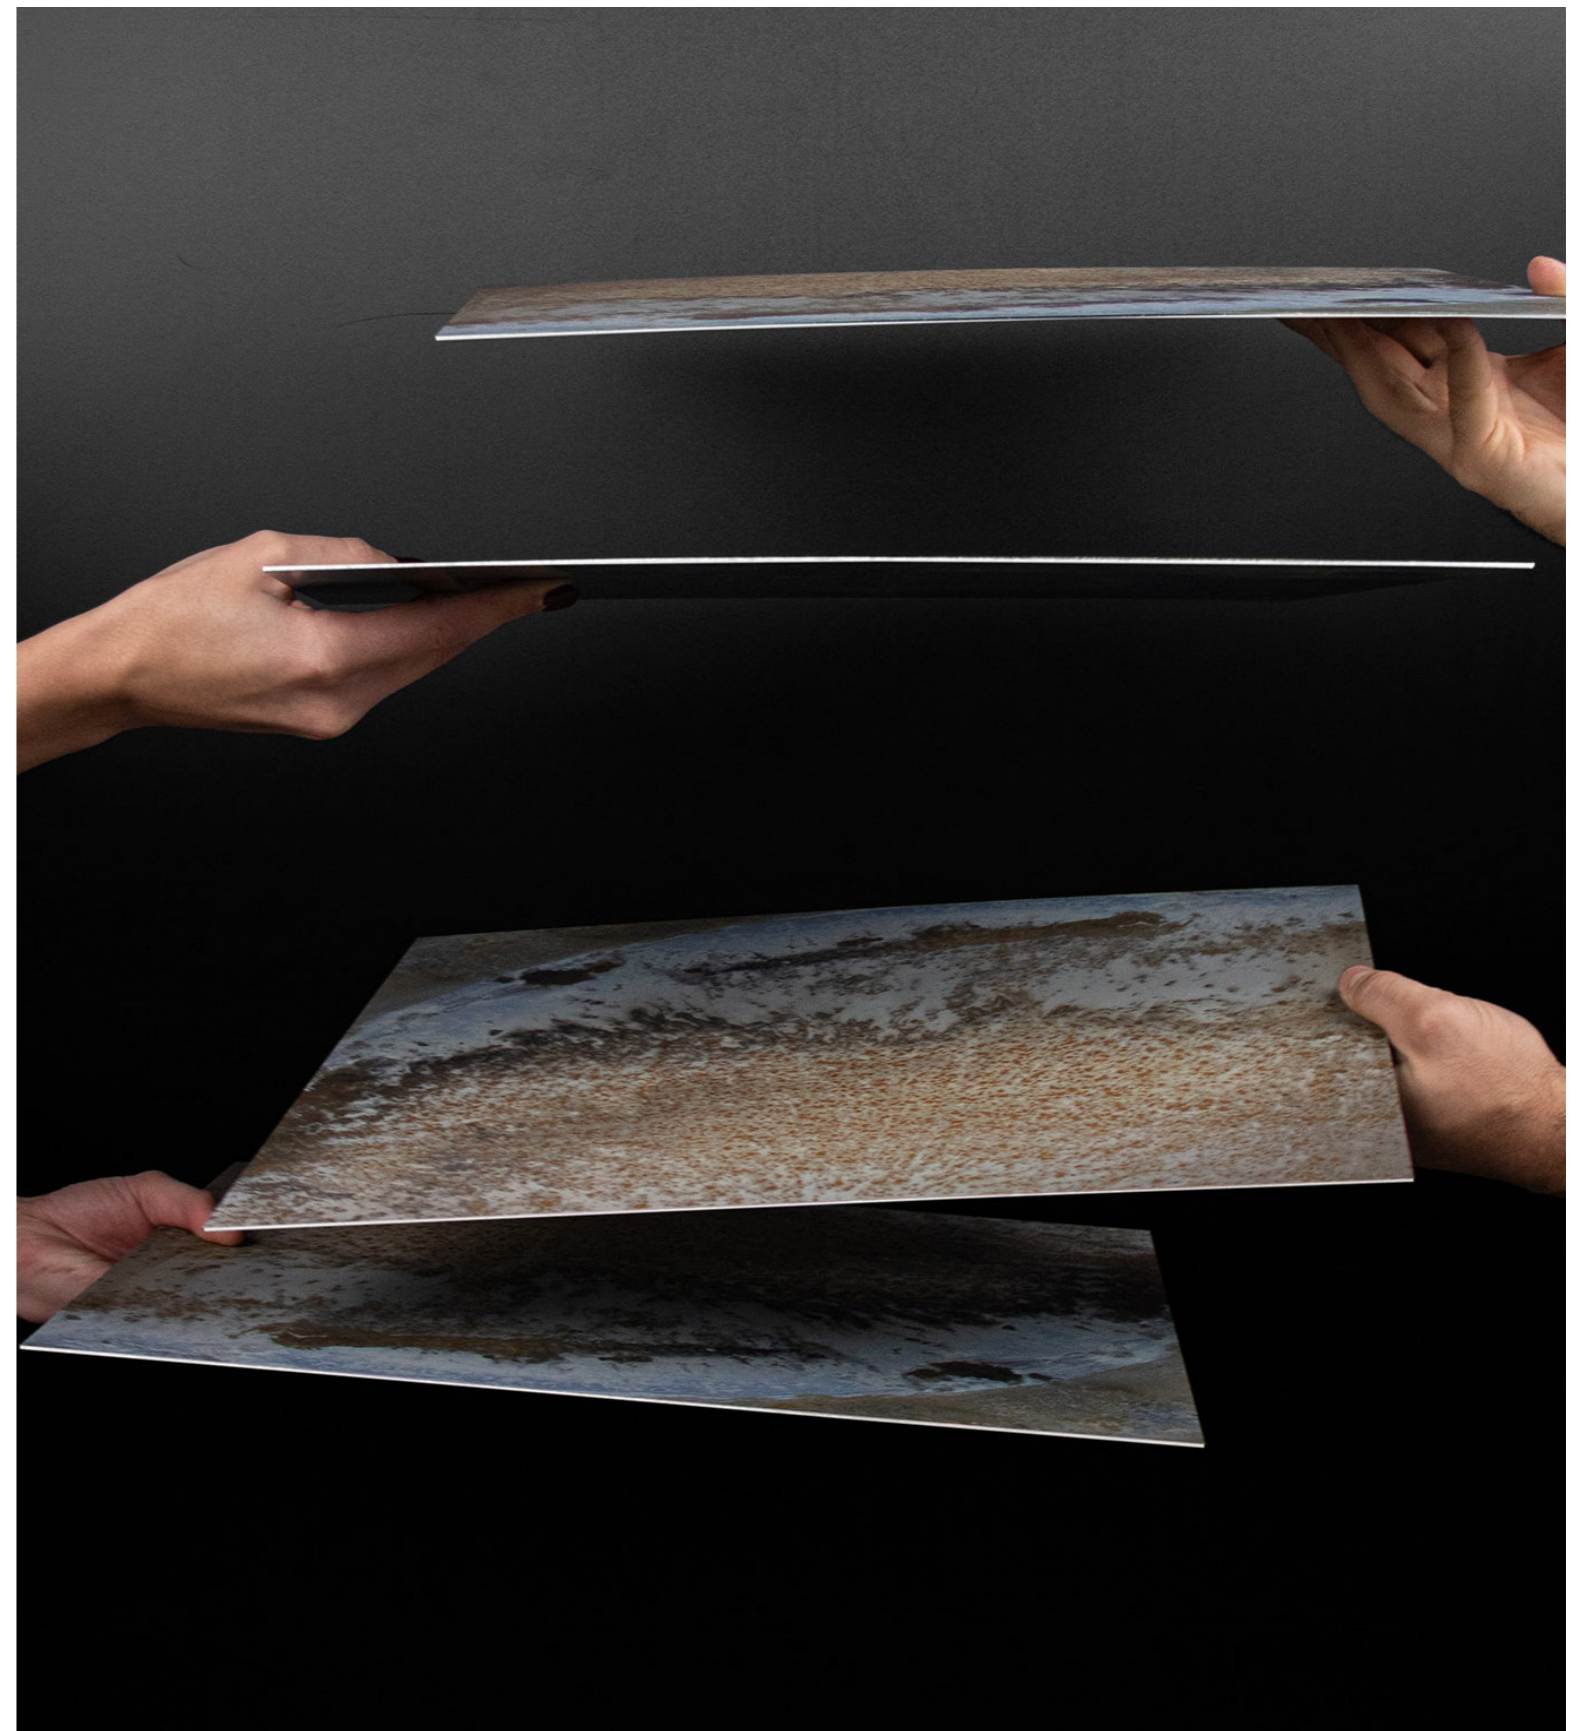

ULTRALIGHT

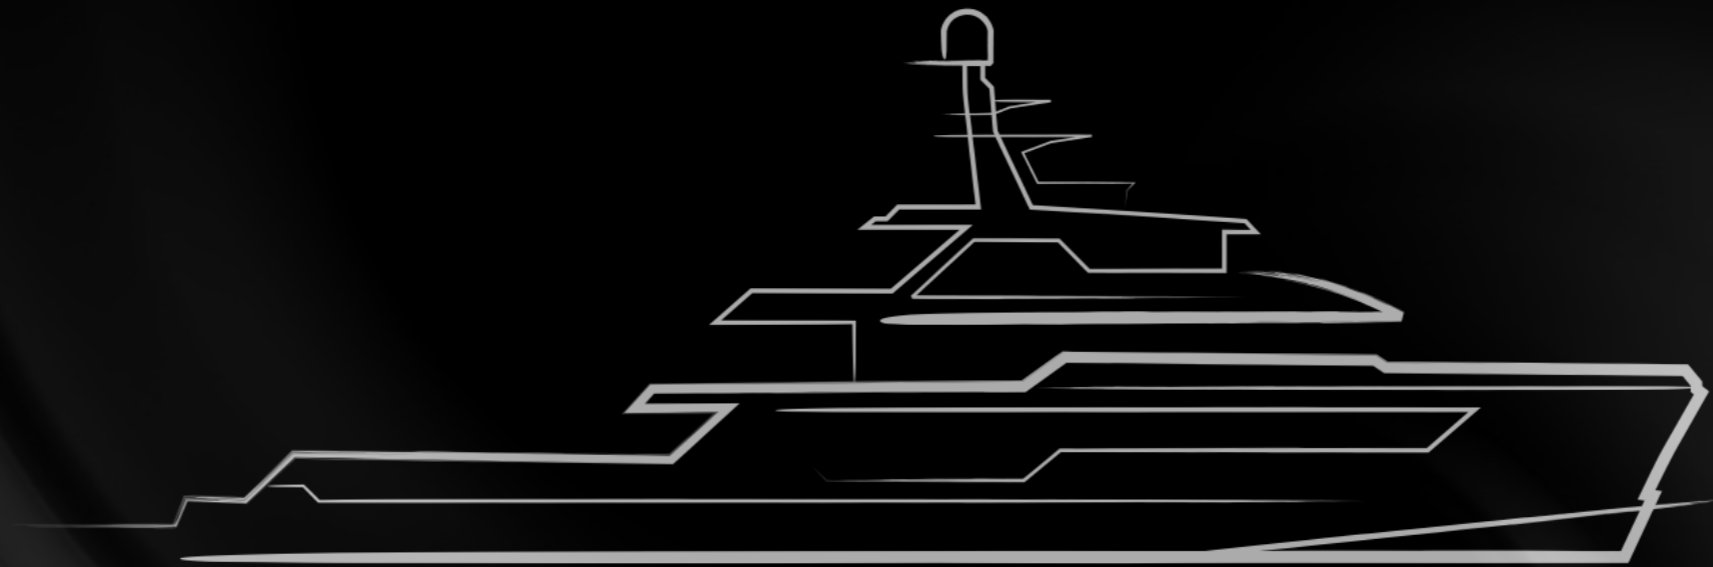

Efficient - Powerful - Lightweight

Ultralight is an ultra-thin aluminium slab that revolutionises wallcoverings with its exceptional lightness, easy transport, and quick installation.

Thanks to high-resolution printing technologies, it offers superior graphic quality with endless customisation possibilities, including 3D relief effects and matte or glossy finishes.

Combining Tecnografica's artistic expertise with innovative product design, Ultralight creates new opportunities in the industry. Beyond aesthetics, its durability and minimal weight significantly reduce construction costs and simplify installation, making it the ideal solution compared to heavier, more fragile materials.
